

We prepare coffee in various ways: jezve, aeropress, pour over, espresso machine. We use our own experience and international standards SCA *.

There are two types of milk in the menu: cow and oatmeal. Water for espresso passes five stages of purification. We use premium BWT bestmax technology.

Water for tea, ice cubes for cocktails are prepared from purified water.

We give a short menu with food and desserts, so they are always fresh and high-quality.

Our musical selection of plates is chosen by Taras Malyy.

We work daily from 8:30 A.M to 9.00 P.M.

**SCA (The Speciality Coffee Association) is an international non-commercial community where the thousands of coffee professionals and enthusiastic amateurs can share their own knowledge and experience with each other.*
